Institution description

The HARMONY Alliance Foundation is a Spanish private non-profit foundation whose main purposes are to foster, carry out, promote, and develop scientific research activities and innovation in the field of medicine and health sciences, with special emphasis on the field of haematology, and to accelerate the translation of research finding and innovation into clinical practice, through public-private partnerships.

In 2025, with 128 partners from 28 countries, we have transformed both the sharing and use of data. We have developed the HARMONY Platform with a data lake that has identified over 165,000 patient records. All data is protected using a

unique anonymization and security process. In more than 30 research projects, groundbreaking research is being carried out with the help of advanced customized data analytic services, including AI modeling.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes
