## Administrative details

### Administrative details

#### PURI

<https://redirect.ema.europa.eu/resource/1111165>

#### Data source ID

1111165

#### Data source acronym

SKHDL

#### Data holder

[Shamir Medical Center](#)

### **Data source type**

Emergency care discharge records

Hospital inpatient records

Hospital outpatient visit records

Other

---

### **Data source type, other**

The source include all treatment information: Diagnosis, procedures, drugs, lab test, CT, MRI, monitoring etc.

---

### **Main financial support**

Funding from industry or contract research

National, regional, or municipal public funding

---

### **Care setting**

Hospital inpatient care

Hospital outpatient care

Secondary care – specialist level (ambulatory)

---

### **Data source qualification**

If the data source has successfully undergone a formal qualification process (e.g., from the EMA, ISO or other certifications), this should be described.

Yes

---

### **Description of the qualification**

IQVIA Quality verification

---

### **Data source website**

<https://kineret.health.gov.il/en>

## **Contact details**

## Data source regions and languages

### Data source countries

Israel

---

### Data source languages

English

## Data source establishment

### Data source established

15/06/2022

---

### Data source time span

**First collection:** 15/06/2005

The date when data started to be collected or extracted.

## Publications

### Data source publications

[Optimizing Operation Room Utilization—A Prediction Model](#)

## Data elements collected

The data source contains the following information

## **Disease information**

Does the data source collect information with a focus on a specific disease? This might be a patient registry or other similar initiatives.

Yes

---

## **Disease details (other)**

Post COVID effect, other infectious diseases and basically all that result in hospital admission or ER visit

---

## **Rare diseases**

Are rare diseases captured? In the European Union a rare disease is one that affects no more than 5 people in 10,000.

Yes

---

## **Pregnancy and/or neonates**

Does the data source collect information on pregnant women and/or neonatal subpopulation (under 28 days of age)?

Yes

---

## **Hospital admission and/or discharge**

Yes

---

## **ICU admission**

Is information on intensive care unit admission available?

Yes

---

## **Cause of death**

Captured

---

## **Cause of death vocabulary**

Other

---

## **Cause of death vocabulary, other**

OHDSI standard

---

## **Prescriptions of medicines**

Captured

---

## **Prescriptions vocabulary**

other

---

## **Prescriptions vocabulary, other**

OHDSI standard

---

## **Dispensing of medicines**

Captured

---

## **Dispensing vocabulary**

other

---

## **Dispensing vocabulary, other**

OHDSI standard

---

## **Advanced therapy medicinal products (ATMP)**

Is information on advanced therapy medicinal products included? A medicinal product for human use that is either a gene therapy medicinal product, a somatic cell therapy product or a tissue engineered products as defined in Regulation (EC) No 1394/2007 [Reg (EC) No 1394/2007 Art 1(1)].

No

---

## **Contraception**

Is information on the use of any type of contraception (oral, injectable, devices etc.) available?

No

---

## Indication for use

Does the data source capture information on the therapeutic indication for the use of medicinal products?

Captured

---

## Indication vocabulary

Other

---

## Indication vocabulary, other

OHDSI standard

---

## Medical devices

Is information on medicinal devices (e.g., pens, syringes, inhalers) available?

Yes

---

## Administration of vaccines

Yes

---

## Procedures

Does the data source capture information on procedures (e.g., diagnostic tests, therapeutic, surgical interventions)?

Captured

---

## Procedures vocabulary

Other

---

## Procedures vocabulary, other

OHDSI standard

---

## Healthcare provider

Is information on the person providing healthcare (e.g., physician, pharmacist, specialist) available?  
The healthcare provider refers to individual health professionals or a health facility organisation licensed to provide health care diagnosis and treatment services including medication, surgery and medical devices.

No

---

## **Clinical measurements**

Is information on clinical measurements (e.g., BMI, blood pressure, height) available?

Yes

---

## **Genetic data**

Are data related to genotyping, genome sequencing available?

Captured

---

## **Genetic data vocabulary**

Other

---

## **Genetic data vocabulary, other**

OHDSI standard

---

## **Biomarker data**

Does the data source capture biomarker information? The term “biomarker” refers to a broad subcategory of medical signs ( objective indications of medical state observed from outside the patient), which can be measured accurately and reproducibly. For example, haematological assays, infectious disease markers or metabolomic biomarkers.

Captured

---

## **Biomarker data vocabulary**

Other

---

## **Biomarker vocabulary, other**

OHDSI standard

---

## **Patient-reported outcomes**

Is information on patient-reported outcomes (e.g., quality of life) available?

Yes

---

## **Patient-generated data**

Is patient-generated information (e.g., from wearable devices) available?

No

---

## **Units of healthcare utilisation**

Are units of healthcare utilisation (e.g., number of visits to GP per year, number of hospital days) available or can they be derived? Units of healthcare utilisation refer to the quantification of the use of services for the purpose of preventing or curing health problems.

Yes

---

## **Unique identifier for persons**

Are patients uniquely identified in the data source?

Yes

---

## **Diagnostic codes**

Captured

---

## **Diagnosis / medical event vocabulary**

Other

---

## **Diagnosis / medical event vocabulary, other**

OHDSI standard

---

## **Medicinal product information**

Captured

---

## **Medicinal product information collected**

Active ingredient(s)

Brand name

Dose

Package size

Route of administration

---

## **Medicinal product vocabulary**

Other

---

## **If 'other,' what vocabulary is used?**

OHDSI standard

---

## **Quality of life measurements**

Captured

---

## **Quality of life measurements vocabulary**

other

---

## **Quality of life measurements, other**

OHDSI standard

---

## **Lifestyle factors**

Captured

---

## **Lifestyle factors**

Alcohol use

Diet

Tobacco use

---

## **Sociodemographic information**

Captured

---

### **Sociodemographic information collected**

Age

Gender

Living in rural area

Marital status

## **Quantitative descriptors**

### **Population Qualitative Data**

#### **Population age groups**

Paediatric Population (< 18 years)

Preterm newborn infants (0 – 27 days)

Term newborn infants (0 – 27 days)

Infants and toddlers (28 days – 23 months)

Children (2 to < 12 years)

Adolescents (12 to < 18 years)

Adults (18 to < 46 years)

Adults (46 to < 65 years)

Elderly ( $\geq$  65 years)

Adults (65 to < 75 years)

Adults (75 to < 85 years)

Adults (85 years and over)

---

## **Estimated percentage of the population covered by the data source in the catchment area**

60%

---

## **Description of the population covered by the data source in the catchment area whose data are not collected (e.g., people who are registered only for private care)**

The medical center is a Governmental medical center that serves all area population. The catchment area is partially overlap by other private hospitals.

## Family linkage

### **Family linkage available in the data source permanently or can be created on an ad hoc basis**

Ad hoc

## Population

### **Population size**

1664149

---

### **Active population size**

261922

## Population by age group

Age group	Population size	Active population size
-----------	-----------------	------------------------

Paediatric Population (< 18 years)	425532	53462
Preterm newborn infants (0 – 27 days)	9574	592
Term newborn infants (0 – 27 days)	169239	9676
Infants and toddlers (28 days – 23 months)	135213	9694
Children (2 to < 12 years)	219049	25719
Adolescents (12 to < 18 years)	141559	13474
Adults (18 to < 46 years)	856942	96620
Adults (46 to < 65 years)	366779	52863
Elderly (≥ 65 years)	254976	60499
Adults (65 to < 75 years)	176747	32182
Adults (75 to < 85 years)	104655	20771
Adults (85 years and over)	42924	8878

## Data flows and management

### Access and validation

#### Biospecimen access

Are biospecimens available in the data source (e.g., tissue samples)?

Yes

---

## **Biospecimen access conditions**

The Biospecimens are stored in the Medical center lab, access required an IRB approval.

---

## **Access to subject details**

Can individual patients/practitioners/practices included in the data source be contacted?

Yes

---

## **Description of data collection**

All data is collecting during the patient treatment at the hospital, one can divide the data into 3 main types: Emergency room, admission and outpatient clinics.

# Event triggering registration

## **Event triggering registration of a person in the data source**

Start of treatment

---

## **Event triggering creation of a record in the data source**

The trigger for creating a data is record a patient in the Hospital EHR this can be due to inpatient admission, emergency admission of outpatient visit.

# Data source linkage

## **Linkage**

Is the data source described created by the linkage of other data sources (prelinked data source) and/or can the data source be linked to other data source on an ad-hoc basis?

Yes

---

### **Linkage description, pre-linked**

We perform the same anonymization and unify ID process for the images and it's related metadata from the NON EHR systems, completing this process, the linkage to the OMOP data is by the same person ID

## **Linked data sources**

### **Pre linked**

Is the data source described created by the linkage of other data sources?

Yes

---

### **Data source, other**

The OMOP data gathering information from the main EHR system, for a study require additional information from NON EHR systems, we combines all information need in the same study data-set.

At the hospital there are additional systems like: PACS that contain many different type of imaging, intracoronary pressure measurement system, In vitro fertilization (IVF) system and more.

---

### **Linkage variable**

The linkage variable between the OMOP data and other NON OMOP data is the network unique person\_id.

---

### **Linkage completeness**

The linkage result in a full patient information attached to each NON OMOP information, like images or intravascular pressure test.

## **Data management specifications that apply for the data source**

**Data source refresh**

Quarterly

---

**Informed consent for use of data for research**

Required for all studies

---

**Possibility of data validation**

Can validity of the data in the data source be verified (e.g., access to original medical charts)?

Yes

---

**Data source preservation**

Are records preserved in the data source indefinitely?

Yes

---

**Approval for publication**

Is an approval needed for publishing the results of a study using the data source?

Yes

---

**Data source last refresh**

31/03/2023

## Common Data Model (CDM) mapping

**CDM mapping**

Has the data source been converted (ETL-ed) to a common data model?

Yes

**CDM Mappings**

**CDM name**

OMOP

---

**CDM website**

<https://www.ohdsi.org/Data-standardization/>

---

**Data source ETL CDM version**

5.3

---

**Data source ETL frequency**

3,00 months

---

**Data source ETL status**

Completed
