No

## Institution description

The Wolfson Centre for Personalised Medicine is a joint investment by the Wolfson Foundation and The University of Liverpool. Research is conducted into the epidemiology, causes, characteristics and consequences of drug efficacy and toxicity, aiming to improve the benefit:risk ratio of drugs through enhanced drug design and drug and patient selection. The Centre is involved in clinical trials, basic science, and epidemiology and bioinformatics research. An institutional profile is available: Alfievic A, Carr DF, Miyajima F, Pushpakom S, Sutton L, Jorgensen AL, Pirmohamed M. The Wolfson Centre for Personalised Medicine, University of Liverpool, Liverpool, UK. Pharmacogenomics 2013, 14 (8): 861-867.

## Institution details

**Experience with collecting data directly from individual patients or respondents:**

Yes

---
