Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

EU RMP category 3 (required)

Methodological aspects

Study type

Study type list

Study topic:

Human medicinal product

Study type:

Non-interventional study

Scope of the study:

Other

If ‘other’, further details on the scope of the study

Regulatory Post Marketing Surveillance.

Data collection methods:

Primary data collection

Main study objective:

To collect safety and effectiveness data of Votrient in Korean patients.

Study Design

Non-interventional study design

Other

Non-interventional study design, other

Non-interventional, open-label, single group, multicentre post-marketing surveillance.

Study drug and medical condition

Study drug International non-proprietary name (INN) or common name

PAZOPANIB

Population studied

Short description of the study population

Advanced renal cell carcinoma or soft tissue sarcoma patients administered Votrient at the site.

Age groups

- Adults (18 to < 46 years)
- Adults (46 to < 65 years)
- Adults (65 to < 75 years)
- Adults (75 to < 85 years)
- Adults (85 years and over)

Special population of interest

Hepatic impaired

Immunocompromised

Renal impaired

Estimated number of subjects

3000

Study design details

Outcomes

Adverse events in patients administrated Votrient. Unexpected adverse drug reaction (ADR), serious adverse event (SAE) and effectiveness in patients administrated Votrient.

Data analysis plan

Non-interventional, open-label, single group, multicentre post-marketing surveillance.
