Study description

This study analyses prescribing of digoxin between 2000 and 2014 and focuses on patients with atrial fibrillation. The study includes overall digoxin prescribing, digoxin prescribing in patients with atrial fibrillation, and digoxin prescribing in patients with atrial fibrillation without heart failure. Results are analysed by gender and age group (75 years or older and less than 75 years).

Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

Not applicable

Methodological aspects

Study type

Study type list

Study topic:

Human medicinal product

Disease /health condition

Study type:

Non-interventional study

Scope of the study:

Drug utilisation

Data collection methods:

Secondary use of data

Main study objective:

To study prescribing of digoxin in patients with atrial fibrillation

Study Design

Non-interventional study design

Other

Non-interventional study design, other

Descriptive study

Study drug and medical condition

Study drug International non-proprietary name (INN) or common name

DIGOXIN

Medical condition to be studied

Atrial fibrillation

Population studied

Short description of the study population

Atrial fibrillation patients receiving a prescription of digoxin for oral use, excluding products that contain digoxin in combination with another active substance, recorded in the IMS Disease Analyser in France and Germany.

Age groups

Preterm newborn infants (0 – 27 days)

Term newborn infants (0 – 27 days)

Infants and toddlers (28 days – 23 months)

Children (2 to < 12 years)

Adolescents (12 to < 18 years)

Adults (18 to < 46 years)

Adults (46 to < 65 years)

Adults (65 to < 75 years)

Adults (75 to < 85 years)

Adults (85 years and over)

Special population of interest

Renal impaired

Hepatic impaired

Immunocompromised

Pregnant women

Estimated number of subjects

19000

Study design details

Data analysis plan

The yearly prevalence of prescribing of digoxin will be estimated from the number of patients with a prescription and the total number of patients with a consultation during the time period.

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025. The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.
