Yes

Institution description

Cambridge Real-Life Research Organisation has been established to facilitate research for academics, health care professionals and sponsor companies and build partnership in community care research. Based on a strong foundation in the respiratory setting, we are able to translate our knowledge and experience to conduct research across therapeutic areas. We both propose and take on and develop research ideas and through collaboration turn these propositions into real-life clinical studies.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes
