Methodological aspects

Study type

Study type list

Study topic:

Disease /health condition

Human medicinal product

Study type:

Non-interventional study

Scope of the study:

Assessment of risk minimisation measure implementation or effectiveness

Effectiveness study (incl. comparative)

Data collection methods:

Primary data collection

Main study objective:

The main objectives are to evaluate the following items under routine practice:1) Serious adverse event(AE)/adverse drug reaction (ADR) 2) Unexpected ADR 3) Expected ADR 4) Non-serious AE 5) AE occurred by misuse,

abuse and drug interaction 6) Any factors influencing safety and efficacy parameters (influencing lab. data, etc)

Study Design

Non-interventional study design

Other

Non-interventional study design, other

Prescription event monitoring

Study drug and medical condition

Medicinal product name

MIRCERA

Medical condition to be studied

Anaemia

Population studied

Short description of the study population

Patients who were prescribed Mircera® by their physician according to the local Korean Mircera® label, for the treatment of anemia associated with chronic kidney disease who require Erythropoiesis-Stimulating Agents (ESA) therapy.

Age groups

- Adults (18 to < 46 years)
- Adults (46 to < 65 years)
- Adults (65 to < 75 years)
- Adults (75 to < 85 years)
- Adults (85 years and over)

Special population of interest

Renal impaired

Estimated number of subjects

600

Study design details

Data analysis plan

According to the data, t-test or chi-square test was performed.Adverse events were tabulated in summary tables as followings:Summary table of incidence status of AEs/ADRs by System Organ ClassSummary table of drug - adverse events relationshipSummary table of Intensity of Adverse events/Adverse Drug ReactionsSummary table of Incidence rate Unexpected AEs/ADRs by System Organ Class

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025. The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.
