Galderma Korea Ltd.

Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

Not applicable

Methodological aspects

Study type

Study type list

Study type:

Non-interventional study

Scope of the study:

Drug utilisation

Main study objective:

This Post Marketing Surveillance (PMS) aims to evaluate the safety and efficacy of Soolantra cream 1% in adult patients in practical usage condition.(1) Serious adverse events adverse drug reactions(2) Serious or non-serious unlisted, unexpected adverse events or adverse drug reactions(3) Listed serious or non-serious adverse drug reactions (4) Other safety, efficacy related information

Study Design

Non-interventional study design

Cohort

Study drug and medical condition

Name of medicine, other

Soolantra cream 1% (Ivermectin)

Medical condition to be studied

Papulopustular rosacea

Population studied

Age groups

Adults (18 to < 46 years)

Adults (46 to < 65 years)

Adults (65 to < 75 years)

Adults (75 to < 85 years)

Adults (85 years and over)

Estimated number of subjects

600

Study design details

Outcomes

The number of occurrence case, occurrence rate and frequency of AE, SAE, ADR, SADR, unexpected AE, unexpected SAE, unexpected ADR and unexpected SADR will be analyzed with Wald or 95% confidence interval, Absolute change and change rate in inflammatory lesion count from baseline at 4 weeks after administrationOverall improvement rate at 4 weeks after administration

---

Data analysis plan

number of occurrence case, occurrence rate and frequency of AE, SAE, ADR, SADR, unexpected AE, unexpected SAE, unexpected ADR and unexpected SADR will be analyzed with Wald or 95% confidence interval

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025. The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.
