Institution description

OPRI aims to improve outcomes for patients by undertaking the highest quality observational and pragmatic clinical research in disease burden and management. We achieve this through direct involvement in the following initiatives:• Initiating,conducting and disseminating original observational database studies that identify and address areas for improvement in patient care,treatments and medical interventions• Initiating,conducting and disseminating original pragmatic clinical research in respiratory medicine.• Working with industry partners to carry out unbiased real life research in the areas of drug development and regulatory compliance• Ensuring effective medical communications of real life research outcomes• Collaborating with clinical,academic and industry partners to drive a vision for inclusion of real life research into all aspects of medical research
