Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

Non-EU RMP only

Methodological aspects

Study type

Study type list

Study topic:

Disease /health condition

Human medicinal product

Study type:

Non-interventional study

Scope of the study:

Effectiveness study (incl. comparative)

Data collection methods:

Primary data collection

Study design:

Non-interventional, observational study based on new data collection

Main study objective:

To investigate the safety and effectiveness of Spiriva Respimat in patients with asthma under the real-world use.

Study Design

Non-interventional study design

Cohort

Other

Non-interventional study design, other

Non-interventional, observational study based on new data collection

Study drug and medical condition

Medicinal product name

SPIRIVA RESPIMAT

Study drug International non-proprietary name (INN) or common name

TIOTROPIUM

Anatomical Therapeutic Chemical (ATC) code

(R03BB04) tiotropium bromide

tiotropium bromide

Medical condition to be studied

Asthma

Population studied

Short description of the study population

Patients aged ≥ 15 years old with severe persistent asthma who were naive to Spiriva respimat and receive Spiriva Respimat for the first time for the treatment of bronchial asthma on top of at least ICS treatment where safety of Spiriva® 2.5 µg Respimat® 60 puffs under the real-world use was not confirmed in clinical trials.

Age groups

- Adolescents (12 to < 18 years)
 - Adults (18 to < 46 years)
 - Adults (46 to < 65 years)
 - Adults (65 to < 75 years)
 - Adults (75 to < 85 years)
 - Adults (85 years and over)
-

Special population of interest

Other

Special population of interest, other

Asthma patients

Estimated number of subjects

360

Study design details

Setting

Planned number of subjects: 360

Comparator product: Not applicable

Duration of treatment: 52 weeks

Outcomes

The primary Outcome is the absolute and relative (%) frequency of patients with suspected adverse drug reactions (ADRs). Change from baseline in asthma control status

Data analysis plan

To be analysed only descriptively
