Institution description

We are a French CRO founded in 1990,with strong links and partnerships with universities and opinion leaders in various fields. About 25 researchers are working in our structure. We offer expert project management, from the concept of the study, through field project and monitoring, to publication.We do field studies (cohort, case-control),as well as analysis on databases, with a strong emphasis on patient-derived data. We also have acces to the French National Hospital Data Base containing all hospitalization informations since 2004. Studies done include effectiveness (absolute or comparative),drug utilization, safety, economics, etc... mostly concerning medication, but also devices or Other health interventions.

Institution details
