Institution description

Centre for Health and Infectious Disease Research (CHIP) is a research unit at Rigshospitalet - University of Copenhagen. The continued aim of CHIP is the execution of front-line HIV-research. Therefore, we will continue to strengthen our national and international network of collaborating partners, and remain focused on addressing clinically relevant questions that improve patient care. CHIP is collaborating with more than 200 clinical departments and research teams in Europe, USA, Canada, Argentina and Australia.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes

Interest in carrying out research that is funded by pharmaceutical companies:

Yes
