Yes

Institution description

As an independent, non-profit cancer research organisation, our mission is to coordinate and conduct international translational and clinical research to

improve the standard of cancer treatment for patients. We aim ultimately to increase people's survival and quality of life by testing new therapeutic strategies based on existing drugs, surgery and radiotherapy. We also help develop new drugs and approaches in partnership with the pharmaceutical industry and in patients' best interests. EORTC is uniquely: International: activities across 35 countries. Multidisciplinary: our research spans all aspects of cancer management, from imaging and radiology to surgery and therapeutic innovations. Multi-tumour: no tumour is too rare to tackle. Compliant with regulation: EORTC's experts ensure our activities meet the strictest quality and reliability requirements. Independent: our research is conducted under conditions of unwavering independence and accountability and all results made public

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes
