Institution description

Institute of Applied Economics and Health Research Aps (ApHER),is an independent organization aimed at conducting research,education and providing strategic consulting services within Economics,Health and Epidemiology,QoL,Ethics and Sustainable Development. We work within a network of academic and industry professionals in Denmark,the Scandinavian countries and UK. During the last 10 years we have been part of initiatives in the industry and in the universities taken to promote further development and clinical-epidemiological research in relation to the increasing network of registers and clinical databases established in the Nordic countries. In the last 10 years we have performed several observational multi-country studies (PAS) based on Nordic registers which have been reported and published.

Institution details
