Institution description

Synapse Medicine is a French startup specialized in artificial intelligence dedicated to medication usage. In the field of research and development applied

to pharmacovigilance, we are developing deep learning and natural language processing algorithms to process free text data and automate the analysis of adverse drug reaction reports. We are also applying our methods to signal detection and pharmacoepidemiology.

Institution details

Experience with collecting data directly from individual patients or respondents:

No

Interest in carrying out research that is funded by pharmaceutical companies:

Yes
