Study timelines

Date when funding contract was signed

Planned: 31/07/2020 Actual: 25/08/2020

Study start date

Planned: 31/08/2021

Date of final study report

Planned: 30/04/2026

Sources of funding

Pharmaceutical company and other private sector

More details on funding

Eli Lilly & Co.

Study protocol

I1F-MC-B015 PASS Protocol v1.0_Redacted.pdf (4.36 MB)

Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

EU RMP category 3 (required)

Methodological aspects

Study type

Study type list

Study type:

Non-interventional study

Scope of the study:

Assessment of risk minimisation measure implementation or effectiveness Drug utilisation

Main study objective:

To monitor the uptake of ixekizumab in a real-world pediatric population To characterize the demographics and clinical characteristics of pediatric patients receiving ixekizumab To provide additional information about the long-term safety pertaining to serious infections and inflammatory bowel disease

Study Design

Non-interventional study design

Cohort

Study drug and medical condition

Study drug International non-proprietary name (INN) or common name IXEKIZUMAB

Medical condition to be studied

Psoriasis

Population studied

Age groups

Children (2 to < 12 years)

Adolescents (12 to < 18 years)

Estimated number of subjects

400

Study design details

Outcomes

Demographic and clinical characteristics of pediatric patients receiving ixekizumab, Long-term safety pertaining to serious infections and inflammatory bowel disease in pediatric patients receiving ixekizumab

Data analysis plan

TBD

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025.

The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.
