Institution description

Certara is an organization advancing modern, efficient drug development and provides modeling & simulation, regulatory and real-world value assessment software platforms and services. Certara (previously Analytica Laser) leverages electronic health care databases (EHCD) and electronic Medical Records (EMR) as well as its own data resource PGRx for studies in comparative effectiveness and relative risk, market access studies and bridging-to-real life studies as well as Other advanced pharmaco-epidemiological research. Certara also links observational studies to advanced modeling in so-called access data platforms built for bridging-to-real life studies. Certara studies aim to determine (not limited to):- Impact of medicines and health technologies on drug and resource utilization- Comparative/relative effectiveness of medicines & health technologies- Relative risk and continuous benefit-risk of pharmaceuticals
