Study description
To study the adherence to the risk minimization measures in the product
information by estimating the compliance with contraindications and target
indication amongst incident romosozumab users, and analyzing the utilization
patterns.

# Study timelines

### Date when funding contract was signed

Planned: 30/09/2020 Actual: 30/09/2020

### Study start date

Planned: 01/10/2020 Actual: 01/10/2020

### Data analysis start date

Planned: 30/09/2026

### **Date of final study report**

Planned: 31/03/2027

# Sources of funding

• Pharmaceutical company and other private sector

# More details on funding

UCB Biopharma SRL

# Study protocol

op0005-protocol-final-Redacted.pdf (1.18 MB)

# Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

EU RMP category 3 (required)

# Methodological aspects

Study type

Study type list

Study type:

Non-interventional study

Scope of the study:

Assessment of risk minimisation measure implementation or effectiveness Drug utilisation

### Main study objective:

To study the adherence to the risk minimization measures in the product information by estimating the compliance with contraindications and target indication amongst incident romosozumab users, and analyzing the utilization patterns.

# Study drug and medical condition

### Name of medicine

**EVENITY** 

### Medical condition to be studied

Osteoporosis postmenopausal

# Population studied

### Age groups

Adults (18 to < 46 years)

Adults (46 to < 65 years)

Adults (65 to < 75 years)

Adults (75 to < 85 years)

Adults (85 years and over)

### **Estimated number of subjects**

1000

# Study design details

### **Outcomes**

Prevalence of contraindications amongst new romosozumab users, - Prevalence of documented indication amongst new romosozumab users- Monthly prevalence of use for each osteoporosis drug- Monthly incidence of use for each osteoporosis drug- Overall duration of treatment/persistence- Proportion persistent at 6, 12, 18, and 24 months- number and percentage of patients who switch to another osteoporosis medication

### **Data analysis plan**

All measures of primary and secondary outcomes will be calculated for each of the contributing databases separately. Estimates will be provided overall (for the whole source population) and stratified by sex (except for use in men), age (5-year bands) and calendar year. Baseline characteristics of all users of romosozumab and of other osteoporosis medications, as well as of romosozumab users in each of the contraindication and restriction of indication groups, will be described.

# Data management

## **ENCePP Seal**

The use of the ENCePP Seal has been discontinued since February 2025.

The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.

# Data sources

### Data source(s)

Clinical Practice Research Datalink

Danish registries (access/analysis)

Integrated Primary Care Information (IPCI)

The Information System for Research in Primary Care (SIDIAP)

German Pharmacoepidemiological Research Database

### **Data sources (types)**

Administrative healthcare records (e.g., claims)

Electronic healthcare records (EHR)

# Use of a Common Data Model (CDM)

### **CDM** mapping

No
