ENCePP partner

Yes

Institution description

We share the vision to drive healthcare forward. To see how we can help accelerate progress and achievements. It’s bigger than better clinical trials. Or advances in technologies and analytics. Or faster insights. It’s about exploring a new path to better health outcomes via Human Data Science. Our global scientific, RWE and operational experts are developing innovative methods for RWE study design and execution combining secondary and primary data directly from patients and physicians. Applications include:

- Post-authorization safety studies (PASS).
- Post-authorization effectiveness studies (PAES).
- Drug Utilization studies (DUS).
- Risk Evaluation and Mitigation Strategy (REMS).
- EU Risk Management Plan.
- Pregnancy Registries.
- Vaccine.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes

Interest in carrying out research that is funded by pharmaceutical companies:

Yes
