Institution role

Researcher

ENCePP partner

Yes

Institution description

MEMO Research at Ninewells Hospital and Medical School undertakes research into the safe, effective and cost-effective use of medicines and devices as well as helping to improve the understanding of disease using anonymised healthcare data. MEMO Research is a well-established academic research unit based in the University of Dundee, Scotland, UK, with experience working across the UK and Europe (including Denmark, Sweden and the Netherlands) delivering world class traditional, hybrid and decentralised clinical trials and pharmacoepidemiological research. Our activities encompass all aspects of clinical research from generation to delivery. We also work closely with academic and health service partners, and regulatory bodies to ensure that the regulatory, legal and quality control aspects of research are met.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes
