Institution description

IQVIA is a leading global provider of advanced analytics, technology solutions and clinical research services to the life sciences industry dedicated to creating intelligent connections that deliver unique innovations and actionable insights. As part of IQVIA, Global Database Studies (GloDaSt) specialises in provision of Real World Evidence (RWE) studies and high quality pharmacoepidemiology research. We utilise Real World Data from various health

registries with patient-level information on drug prescriptions, diagnoses, treatments and outcomes. Our offerings include feasibility studies, post-authorisation safety studies, drug utilisation studies and relative effectiveness studies. Our methodology combines clinical, pharmacological, epidemiological and statistical knowledge.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes
