Institution description

Horiana is a consulting company dedicated to epidemiology and biostatistics and specialized in generating real-world evidence by implementing and conducting studies using primary or secondary real world data and more specifically based on the French nationwide database (SNDS). Its activities mostly focus on the assessment of all health products (vaccine, drug, or medical device) and services (telemonitoring) in all therapeutic areas, with a specific interest in infectious diseases, oncology, and cardiovascular diseases. Based on the 6 founders' extensive experience of more than 15 years, and on a team of 15+ highly qualified people, we offer tailor-made support to the needs of our both public and private clients.

Institution details
