## Institution description

Centogene has built an extensive network of collaborating physicians (>29,000 physicians) globally linked to the diagnosis of rare diseases. Centogene has established a central collection and storage of biosamples of >31 mio unique variants with 400,000 consented biosamples for >2500 rare diseases from >120 countries with consented diagnostic dried blood spot samples to facilitate rapid generation of additional genetic data. Centogene could benefit to ENCePP community as we have a unique access to the largest worldwide RWD Genetic data in rare diseases and happy to collaborate. We have a dedicated team facilitating physician outreach for retrospective and patient identification studies, with Headquarters Rostock, Germany with locations in Boston, USA, Berlin, Germany, and Rotkreuz, Switzerland

## Institution details
