- ☐ Spain
  - ☐ Sweden
  - ☐ Switzerland
  - ☐ United Kingdom
  - ☐ United Kingdom (Northern Ireland)
- 

### **Type of institution**

Patient organisation/association

---

### **Institution role**

Data provider

---

### **Institution website**

<https://www.harmony-alliance.eu/about-us>

---

### **ENCePP partner**

No

## **Institution description**

The HARMONY Alliance is a European Public–Private Partnership for Big Data in Hematology. When we started in 2017, the hematology community was embarking on a journey towards embracing data sharing and recognizing the transformative power of big data. HARMONY set a crucial milestone when this endeavor was only starting. By laying the foundation for future collaborations, advancements, and discoveries that would incorporate state-of-the-art technologies in the field of hematology, we are making our contribution to improving the understanding and treatment of blood disorders.

Now, just almost seven years later with 128 partners from 28 countries, we have transformed both the sharing and use of data. We have developed the Big Data

Platform with a data lake that has identified over 165,000 patient records. All data is protected using a unique anonymization and security process. In more than 30 research projects, groundbreaking research is being carried out with the help of advanced customized data analytic services, including AI modeling.

## Institution details

**Experience with collecting data directly from individual patients or respondents:**

Yes

---

**Interest in carrying out research that is funded by pharmaceutical companies:**

No
