No

Institution description

The Health Research Institute of the Balearic Islands (IdISBa) was born from the association and collaboration among the different centers and facilities that carry out biosanitary and biomedical research activities in the Balearic Islands.

The Institute was established on December 23, 2013, under the name Palma Health Research Institute (IdISPa). In 2017, its statutes and legal name were amended, and it became the Health Research Institute of the Balearic Islands Foundation. IdISBa is composed of the Regional Ministry of Health, Son Espases University Hospital, Primary Care Management of Mallorca, the University Institute for Health Sciences Research (IUNICS), Son Llàtzer University Hospital, and the Blood and Tissue Bank Foundation of the Balearic Islands. All these entities contribute the human capital that has enabled an increase in the critical research mass and fostered collaborations for the development of research projects among health services and professionals.

In January 2019, IdISBa was accredited as a health research institute by the Carlos III Health Institute, in accordance with Royal Decree 279/2016 of June 24, on the accreditation of biomedical or health research institutes.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes

Interest in carrying out research that is funded by pharmaceutical companies:

No
