Regulatory

Was the study required by a regulatory body?

No

Is the study required by a Risk Management Plan (RMP)?

Not applicable

Methodological aspects

Study type

Study type list

Study topic:

Disease /health condition

Study type:

Non-interventional study

Data collection methods:

Secondary use of data

Study design:

A non-interventional (NI) longitudinal cohort design will be employed for this study.

Deidentified patient data collected retrospectively from academic oncology centers will be used to address all study objectives.

Study Design

Non-interventional study design

Cohort

Population studied

Age groups

Adult and elderly population (≥18 years)

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025. The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.

Use of a Common Data Model (CDM)
