Network description

Quirónsalud has more than 60 years of experience in caring for people's health. We represent a network that comprises of over 150 hospitals and other medical facilities, located in 13 regions of Spain. We also have international presence in Lisbon (Portugal), Medellín (Colombia), Cali (Colombia) and Bogotá (Colombia). Moreover, in 2016, four of the main occupational risk prevention companies (Premap, Fraterprevención, Unipresalud y MC Prevención) joined Quirónsalud. That provides us with more than 300 occupational health and safety specialized centers. This makes Quirónsalud the company leader in providing health services in Spain and, following its merger with Helios, owned by Fresenius in 2017. We have become the Europe's number-one health-care provider. We offer our patients health care that covers all medical specialties. We have a highly regarded team over 40.000 professionals, the latest technology, growing research, education programs and a management model based on a solid commitment to quality. Our mission is to foster health and well-being by providing top-quality health services, modern hospital infrastructure, and advanced technology.

Network details
