Study description

This is a post-authorisation efficacy study (PAES) conducted in collaboration with the European Registry and Network for Intoxication Type Metabolic Diseases (E-IMD) that will analyse the ARG1-D population of the pre-existing and active registry held by the E-IMD.

The E-IMD international, multicentric, observational registry collects health data generated during the routine care of affected patients with urea cycle disorders, including ARG1-D.

Study protocol

IMM-PEG-003 Study Protocol v1.0 24Jun2025_Redacted.pdf(444.91 KB)

Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

EU RMP category 2 (specific obligation of marketing authorisation)

Regulatory procedure number

EMA/PAM/0000264956

Methodological aspects

Study type

Study topic:

Human medicinal product

Study type:

Non-interventional study

Scope of the study:

Effectiveness study (incl. comparative)

Data collection methods:

Primary data collection

Study design:

This PAES is conducted in collaboration with E-IMD that will analyse the ARG1-D population of the pre-existing and active registry held by the E-IMD.The E-IMD international, multicentric, observational registry collects health data generated during the routine care of patients with UCD, incl. ARG1-D

Main study objective:

The objective of the study is to evaluate the long-term effectiveness of Loargys treatment in patients with ARG1-D in standard clinical care

Study Design

Non-interventional study design

Cohort

Study drug and medical condition

Name of medicine

LOARGYS

Study drug International non-proprietary name (INN) or common name

PEGZILARGINASE

Anatomical Therapeutic Chemical (ATC) code

(A16AB24) pegzilarginase

pegzilarginase

Medical condition to be studied

Arginase deficiency

Population studied

Short description of the study population

Adult and paediatric patients enrolled in the E-IMD registry with a confirmed diagnosis of ARG1-D

Age groups

Paediatric Population (< 18 years)

Infants and toddlers (28 days – 23 months)

Children (2 to < 12 years)

Adolescents (12 to < 18 years)

Adult and elderly population (≥18 years)

Estimated number of subjects

15

Study design details

Setting

European E-IMD centres treating patients with ARG1-D.

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025. The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.
