### ENCePP partner

Yes

## Institution description

Founded in 2017, we are based in London and Madrid, EpiFocus provides scientific consulting in pharmacoepidemiology. Our dedicated team supports pharmaceutical and biotechnology companies to find solutions in real-world evidence generation across the product lifecycle. Specifically, we carry out evidence reviews (targeted or systematic), database studies (from primary or secondary data sources), data management, and statistical analyses.

We have been co-chair of the Internal Society for Pharmacoepidemiology "ISPE" database working group.

We also provide consultancy in study design and execution as well as evidence-generation strategy.

We have several years of experience in post-authorisation safety studies, including study coordination, execution, protocol and report development and writing. We also provide analyses used in PASS.

We adhere to good pharmacoepidemiology practices, diversity and sustainability and are Ecovadis certified and are currently applying for ISO 27001.

## Institution details

**Experience with collecting data directly from individual patients or respondents:**

No

---

**Interest in carrying out research that is funded by pharmaceutical companies:**

Yes
