No

Network description

iNTD is made up of an internationally leading team of scientists and clinicians. We set up an international registry for the documentation of clinical data from patients with neurotransmitter related disorders.

- Biogenic amines neurotransmitter disorders
- BH4 deficiencies
- Cerebral folate deficiencies

- Serine deficiencies
- Disorders of glycine metabolism
- GABA related disorders
- Co-Chaperone deficiencies

Network details

Network primary therapeutic area:

- Paediatrics
-

Network funding:

- • No external funding
