Institution description

University Hospital Limerick (UHL) is a model 4 acute teaching hospital within the Health Service Executive (HSE) Mid-West region of Ireland. Its Research Directorate coordinates clinical and health services research across the region, including regional health data infrastructure, research governance, and analytics capability. Current research assets include longitudinal clinical datasets in bone health and autonomic medicine, alongside an OMOP Common Data Model platform under development to support standardised, research-ready regional data.

Institution details

Experience with collecting data directly from individual patients or respondents:

Yes

Interest in carrying out research that is funded by pharmaceutical companies:

Yes
