Institution description

NordicRWE is a Norwegian real-world evidence company established in 2022, with operations in Norway, Sweden and Denmark. It conducts observational and registry-based research using Nordic national health registries and linked data sources, covering the full study lifecycle from protocol development to reporting. Work spans oncology external control arms and trial emulation, drug safety signal detection, treatment pattern and outcomes research, and health economic analyses supporting regulatory and Health technology assessment (HTA) submissions.
