Description of data source

SAGIR is a network for the epidemiological surveillance of birds and wild land mammals in France. It is based on a partnership between the Hunters' Federations, the National Office for Hunting and Wildlife (ONCFS) and the Departmental Veterinary Laboratories Its objectives are to: - early detection of

the emerging diseases for wildlife – detect pathogens that can be transmitted to humans and/or shared by wildlife and domestic animals – monitor the unintended acute effects of agricultural use of plant protection products on wild birds and mammals
