Regulatory

Was the study required by a regulatory body?

Yes

Is the study required by a Risk Management Plan (RMP)?

Not applicable

Methodological aspects

Study type

Study type list

Study type:

Non-interventional study

Main study objective:

1. To estimate annual incidence rates of recorded pneumonia by care setting and pneumonia type, overall and stratified by age and sex.
2. To estimate annual proportions of antibiotic use among individuals with recorded pneumonia by care setting and pneumonia type, overall and stratified by age and sex.
3. To characterise antibiotic treatment duration among individuals with recorded pneumonia by care setting and pneumonia type, calendar year, and antibiotic class and ingredient.

Data management

ENCePP Seal

The use of the ENCePP Seal has been discontinued since February 2025. The ENCePP Seal fields are retained in the display mode for transparency but are no longer maintained.
