### ENCePP partner

Yes

## Institution description

iPRI is a new concept in biomedical research combining a thorough, high-level, academic approach coupled with a practical focus on providing clear information about evidence-based clinical, epidemiological and prevention strategies. iPRI serves as an independent authoritative source of advice on critical risk issues and as a high-level training centre in all aspects of Prevention research. IPRI Mission With an outstanding faculty and international expertise, our mission is to bring the available excellence in scientific method to clarify critical issues in disease determination and prevention in order to contribute to the improvement in health of populations worldwide. In some cases, there will be adequate evidence available to draw conclusions, in Others studies will need to be interpreted to allow conclusions to be drawn, and in Other situations studies will need to be organized and established to provide missing evidence.

## Institution details

**Experience with collecting data directly from individual patients or respondents:**

No

---

**Interest in carrying out research that is funded by pharmaceutical companies:**

Yes
