Network description

Medicys is a data collection agency which specialise in building large prospective cohorts/registries of patients enrolled through our European Network of hundreds of healthcare professionals. Many of our studies involve following up patients and/or physicians for periods of up to 10 years. We also specialise in the data collection of prospective and retrospective online/paper PRFs (Patient Record Forms),all completed by healthcare professionals. To date we have been involved in more than 30 such studies and covered indications such as women's health,cardiovascular,oncology,CNS,dermatology to name but a few.
