Institution description

The mission of the Unit of Biostatistics, Epidemiology and Public Health at the University of Milano-Bicocca is to promote and apply quantitative methods in observational and clinical studies, developing novel statistical tools when needed in nonstandard settings. The Unit is involved in research programs with several Italian, European and American academic institutions, resulting in collaborations based on national and European grants. The pharmacoepidemiological research activities of the Unit are mainly carried out by the Laboratory of Pharmacoepidemiology and Healthcare Research. Prof. Giovanni Corrao (full Professor of Medical Statistics) is the laboratory's Scientific responsible. The research staff is composed by several post-doctoral researchers, PhD students and external collaborators.

Institution details

Experience with collecting data directly from individual patients or respondents:

No

Interest in carrying out research that is funded by pharmaceutical companies:

Yes
