Nexplanon Observational Risk Assessment Study (NORA)

The proposed NORA study is a post-authorization safety study (PASS) funded by Merck Sharp & Dohme Corporation (Merck) with an unconditional grant. It is overseen by an independent Safety Monitoring and Advisory Council which has full authority over the study.

No member of the study team (or his/her immediate family) receives his/her salary from Merck nor owns stock or holds stock options in the company. No member of the study team is an employee of Merck or an affiliate of Merck.

As a general policy, ZEG does not accept any money or support from the pharmaceutical industry for talks, presentations, publications, etc.

ZEG has control over data and publication of any study-related material.
