International Active Surveillance Study - Folate in Oral Contraceptives Utilization Study

The proposed VIPOS study is a post-authorization safety study (PASS) funded by Bayer Schering Pharma (BSP) with an unconditional grant. It is overseen by an independent Safety Monitoring and Advisory Council (SMAC) which has full authority over the study.

No member of the study team (or his/her immediate family) receives his/her salary from BSP nor owns stock or holds stock options in the company. No member of the study team is an employee of BSP or an affiliate of BSP.

As a general policy ZEG does not accept any money or support from the pharmaceutical industry for talks, presentations, publications etc.

ZEG has control over data and publication of any study related material.
