Code Definition	Code	Code Category	Code Type	Description

Diagnosed (-28, 0) days of index date	Z3A49	Diagnosis	ICD-10-CM	Greater than 42 weeks gestation of pregnancy

There were two possible definitions to define index date for stillbirth delivery:

1) Two diagnosis codes for stillbirth delivery, intrauterine fetal death (IUFD), or continuing pregnancy after IUFD identified on the index date; or

2) At least one diagnosis code for stillbirth delivery, IUFD, or papyraceous fetus and no co-occurrence of live birth delivery, spontaneous abortion, or induced abortion on the index date.

Additionally, the qualifying index date via either definitions #1 or #2 must have had an accompanying diagnosis code indicating gestational age ≥ 20 weeks in the 28 days prior to (and including) the index date.

If multiple codes for specific weeks of gestation (Z codes), preterm delivery, and/or postterm delivery are available, the ICD-10 algorithm for gestational age prioritizes the following codes:

1) Codes that specify weeks of gestation, including all Z codes ranging from 20 weeks through >=42 weeks of gestation in one week increments, and codes that indicate preterm delivery with weeks of gestation specified in one week increments (other than Z codes). If multiple codes are observed, codes indicating longer gestational age are prioritized over those indicating shorter gestational age. We assumed the approximate mid-point of the specified gestational age [e.g., assumption of 263 days (37 weeks and 4 days) for 37 weeks gestation].

2) Codes that indicate preterm delivery without specifying weeks of gestation. If multiple codes are observed, codes with more specificity (e.g., preterm delivery, 2nd trimester of pregnancy or 'extreme immaturity') are prioritized over those with less specificity (e.g., preterm newborn, unspecified weeks of gestation). Further, codes indicating longer gestational age are prioritized over those indicating shorter gestational age.

3) Codes that indicate postterm delivery without specifying weeks of gestation. If multiple codes are observed, codes indicating longer gestational age are prioritized over those indicating shorter gestational age.

If no codes for preterm or postterm delivery are observed, then the default assumption for gestational age is 273 days. However, this assumption is user specified and can be modified.
