# \*\*\* This document is for information only \*\*\* You will need to apply online in order to add a Data Source

## 'Add a Data Source' Questionnaire

## **RWD Catalogues**

Please complete the questionnaire to register your data source in the RWD Catalogues. Mandatory fields are marked with an asterisk (\*).

The questionnaire comprises **16 questions** divided in **4 steps**: Administrative Details, Data Elements Collected, Quantitative Descriptors and Data Flows and Management. You agreed with the terms and conditions when you joined the RWD Catalogues.

## **Step 1: Administrative details**

#### 1. Administrative details

Name of data source\* [Free text] The name of the data source, as used in European projects, must be provided. If the database is widely known by several names, these can be provided in this field, separated by a '/' sign. Where the data source has been known by different names in the past, these can be provided, using parenthesis with the note 'formerly known as'. Where the name of the data source is in a local language, the English translation should also be provided, using parentheses.

Data source acronym [Free text]	
Data holder* [Drop-down menu with Institutions registered in RWD Catalogues] Name of	
the institution that sustains the data source. If an institution is not included in the catalogue it must be inserted before creating a data source record by following this link: Add Institution in the catalogue. Note that a few days may be needed for the approval of the new institution in the catalogue. Once the Institution is approved, you will be able to link it to a data source and other content of the catalogue.	

Data source type* [Drop-down menu]
□ Administrative healthcare claims
□ Biobank
□ Birth registry
□ Cancer registry
□ Congenital anomaly registry
□ Death registry
<ul> <li>Diagnostic tests or procedures reimbursement</li> </ul>
□ Disease registry
□ Drug registry
□ Emergency care discharge records
□ Exemptions from co-payment
□ Hospital discharge records
□ Hospital inpatient records
□ Hospital outpatient visit records
□ Induced terminations registry
□ Other
□ Pharmacy dispensing records
□ Population registry
□ Primary care medical records
□ Registration with healthcare system
□ Specialist ambulatory care records
<ul> <li>Spontaneous reporting of adverse drug reactions</li> </ul>
□ Vaccination registry
If 'Other' was selected in the last question, Data source type, other [Free text] If 'other',
specify the type of data source

<b>Main financial support</b> [Drop-down menu] <i>Specify the main financial support sources for the data source in the last 3 years. Select all that apply.</i>
European public funding
□ Funding by own institution
□ Funding from industry or contract research
□ Funding from public-private partnership
□ Funds from patients organisations, charity and foundations
□ National, regional, or municipal public funding
□ Other
Care setting [Drop-down menu]
□ Hospital inpatient care
□ Hospital outpatient care
□ Primary care – GP, community pharmacist level
□ Primary care – specialist level (e.g., paediatricians)
□ Secondary care – specialist level (ambulatory)
□ Other
<b>Data source qualification:</b> If the data source has successfully undergone a forma qualification process (e.g., from the EMA, ISO or other certifications), this should be described. [Toggle switch]
□ Yes
□ No
If 'Yes' was selected in the last question, <b>Description of the qualification</b> [Free text Describe the qualification(s) granted.
2. Data course website
2. Data source website
Where such an information is available, add a link to the dedicated webpage describing the data source
<pre>URL [Free text] The format used should be: http://example.com</pre>

Link text [Free text] This is the text that will be displayed for the above URL.
3. Contact details
Name and e-mail address provided here will be made public. A functional (organisation) contact e-mail may be provided
Main contact*
First name* [Free text]
Last name* [Free text]
Email* [Free text]
Alternate contact  If 'Add Contact' was selected:
First name* [Free text]
Last name* [Free text]
Email* [Free text]
4. Data source regions and languages
Data source countries* [Drop-down menu, includes European Union option] Countries where the data originates. Select all that apply.
Data source languages* [Drop-down menu] Languages in which the records in the dat source are recorded. Select all that apply.

<b>Data source regions</b> [Dr Select all that apply.	op-down menu] Geographical r	regions that the data source cover
	I [Date with format dd/mm/aaa	aa] The date when the data source
vas first set-up. This date	can be different from the 'first	collection date'.

# 9. Family linkage

Family linkage available in the data source permanently or can be created on an adhoc basis [Drop-down menu]
□ None
<ul> <li>Permanently</li> </ul>
□ Adhoc
If 'Permantently' was selected in the last question, Family linkage available between the following persons [Drop-down menu]
□ Father-child
□ Household
□ Mother-child
□ Sibling
10. Population
<b>Population size</b> [Numerical value] <i>Total number of unique individuals with records captured in the data source (most recent count)</i>
Active population size [Numerical value] Total number of unique individuals alive and currently registered with active records in the data source, i.e. a record was created and not closed (most recent count). For example, an active population for administrative healthcare data refers to the collection of patients for which there is an active record in the practice, i.e. the record was created and not closed because the patient moved or died.
<b>Population by age group</b> Total number of unique individuals with records captured in the data source (most recent count), split by age groups. If the population size by age cannot be described (e.g., exact numbers are not available), the field 'Estimated percentage of the field population covered by the data source in the catchment area' can be used to add further information.
If 'Add Age group dataset' button was selected:
Age group* [Drop-down menu]

	□ Pubertal and postpubertal adolescents
	□ Term newborn infants
	□ Young animal
	□ Young animal/Newborn
Popula	tion size [Numerical value]
Active	population size [Numerical value]

### 11. Median observation time

**Median observation time (years)** [Numerical value] The median time, in years, between first and last available records for unique individuals captured in the data source

<b>Median observation time active (years)</b> [Numerical value] The median time, in years between first and last available records for unique active individuals (alive and currently registered) captured in the data source
Step 4: Data flows and management
12. Access and validation
Please be aware that the uploaded document will be made public.
Documents or links to webpages that describe the overall governance, processes and procedures for data capture and management, data access, data quality check and validation results, utilisation for research purposes.
Governance details (file)
If 'Add Media' button was selected:
Add Files [Select a file (or several files) from your computer] Unlimited number of file can be uploaded to this field. 20 MB limit. Allowed types: pdf.
Governance details (link)
URL [Free text] The format used for a URL should be http://example.com
URL display text [Free text] This is the text that will be displayed for the above URL
Biospecimen access: Are biospecimens available in the data source (e.g., tissue samples) [Toggle switch]
□ Yes
□ No
<u>If 'Yes' was selected in the last question</u> , <b>Biospecimen access conditions</b> [Free text, limite by 2000 characters]

Access to subject details: Can individual patients/practitioners/practices included in the data source be contacted? [Toggle switch]
□ Yes
□ No
<b>Description of data collection</b> [Free text, limited by 2000 characters] The process of collection and recording of data in the data source. This could include the tools used, such as surveys, or a description of the system that the originator uses to gather data and store it in the data source.
13. Event triggering registration
<b>Event triggering creation of a record in the data source</b> [Free text, limited by 500 characters] The event triggering the creation of a record in the data source should be described (e.g., hospital discharge, specialist encounter, dispensation of a medicinal product, recording of a congenital anomaly). This refers in general to the creation of a record in the data source and not to the registration of a person.
Event triggering de-registration of a person in the data source [Drop-down menu]
□ Death
□ Emigration
□ End of treatment
□ Insurance coverage end
□ Loss to follow up
□ Other
□ Practice deregistration
If 'Other' was selected in the last question, Event triggering de-registration of a person in the data source, other [Free text]

Event triggering registration of a person in the data source [Drop-down menu]
□ Birth
□ Disease diagnosis
<ul> <li>Immigration</li> </ul>
□ Insurance coverage start
□ Other
□ Practice registration
□ Residency obtained
□ Start of treatment
If 'Other' was selected in the last question, Event triggering registration of a person in the data source, other [Free text]
14. Data source linkage
<b>Linkage:</b> Is the data source described created by the linkage of other data sources (prelinked data source) and/or can the data source be linked to other data source on an ad-hoc basis? [Toggle switch]
□ Yes
□ No
<b>Linkage description, pre-linked</b> [Free text] Description of the linkages that are currently available in the data (i.e. created by linkage of other data sources.)
<b>Linkage description, possible linkage</b> [Free text] <i>Linkages to other data sources that are possible on an ad-hoc basis.</i>

<b>Informed consent for use of data for research</b> [Drop-down menu] <i>Is informed required to use the data for research purposes?</i>	consent
□ Not Required	
□ Required for general use	
□ Required for all studies	
□ Required for intervention studies	
□ Waiver	
□ Other	
If 'Other' was selected in the last question, <b>Informed consent, other</b> [Free text] To informed consent required when it does not fit the above categories	「he type
<b>Data source refresh</b> [Drop-down menu] The data source refresh months, if the data is refreshed on fixed months, or time intervals between two consecutive refreshes (sthat apply).	
□ January	
□ February	
□ March	
□ April	
□ May	
□ June	
□ July	
□ August	

□ Se	ptember
□Ос	tober
□ No	vember
□ De	cember
□ Qu	arterly
□ Eve	ery 6 months
□ Yea	arly
	e last refresh [Date with format dd/mm/aaaa] The date when the last refresh of urce occurred
16. Comr	mon Data Model (CDM) mapping
CDM mapp [Toggle swit	ping: Has the data source been converted (ETL-ed) to a common data model?
□ Yes	S
□ No	
CDM Mapp	ings
<u>If `Add Data</u>	source CDM Mapping' button was selected:
CDM	I name [Drop-down menu] Name by which the CDM is most frequently referred
	□ ConcepTION
	□ Other CDM
	□ Sentinel Common Data Model
	□ CDISC SDTM
	□ PCORnet CDM
CDM	I name (other) [Free text] The CDM name, if not available in the above look-up
	a source ETL CDM version [Free text] The version of CDM to which the data ce has been converted

<b>ata source ETL status</b> [Drop-down menu] The status of the conversion process TL) of the data source to the CDM
□ Planned
□ Completed
□ In Progress
□ Not ETL-ed
ata source ETL frequency [Free text] The frequency of the conversion process TL) in months
ata source ETL specifications (file) [Select a file from your computer] Documents scribing the mapping of the data source to the CDM, including codes and scripts to nvert original data to the CDM. One file only. 20 MB limit. Allowed types: pdf.
ata source ETL specifications (link) [Free text] URLs describing the mapping of e data source to the CDM, including codes and scripts to convert original data to the DM. This must be an external URL such as http://example.com.
