Appendix II: Supplementary tables and figures

Tables

Table S 1. Yearly prescribing rates of inhaled salbutamol, categorized by dry powder inhaler, metered-dose inhaler, and solution nebuliser in the CPRD-GOLD, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

Table S 2. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and solution nebuliser in the CPRD-Gold data source.

Table S 3. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and solution nebuliser in the DK-DHR data source.

Table S 4. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and solution nebuliser in the IMASIS data source.

Table S 5. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and nebuliser solution in the IPCI data source.

Table S 6. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and solution nebuliser in the IQVIA DA data source.

Table S 7. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and solution nebuliser in the NAJS data source

Table S 8. Monthly prescribing rates of inhaled salbutamol, categorized by devices dry powder inhaler, metered-dose inhaler, and solution nebuliser in the SIDIAP data source.

Table S 9. Yearly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the CPRD-Gold, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

Table S 10. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. Short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. Short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. Combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. Formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. Salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in CPRD-Gold data source.

Table S 11. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in DK-DHR data source.

Table S 12. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the IMASIS data source

Table S 13. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the IPCI data source.

Table S 14. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the IQVIA DA data source.

Table S 15. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the NAJS data source.

Table S 16. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the SIDIAP data source.

The distribution of predefined indications for use for each inhaled salbutamol prescription within the window -365 and -1 of the index date, stratified by device type and reported separately for each data source: UK CPRD-Gold, Danish DK-DHR, Spanish IMASIS, Dutch IPCI, IQVIA DA, Croatian NAJS, and Spanish SIDIAP.

Figures

Figure S 1. Yearly prescribing rates of inhaled salbutamol by device type -including dry powder inhalers, metered dose inhalers, and solution nebulizers- in the CPRD-Gold, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

Figure S 2. Yearly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the CPRD-Gold, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

The distribution of predefined indications for use of inhaled salbutamol using dry powder inhalers at -365 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IPCI, IQVIA DA, NAJS, and SIDIAP.

The distribution of predefined indications for use of inhaled salbutamol using dry powder inhalers at ± 7 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IPCI, IQVIA DA, NAJS, and SIDIAP.

The distribution of predefined indications for use of inhaled salbutamol using metered-dose inhalers at -365 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

The distribution of predefined indications for use of inhaled salbutamol using metered-dose inhalers at ± 7 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

The distribution of predefined indications for use of inhaled salbutamol using solution nebulizers at -365 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

The distribution of predefined indications for use of inhaled salbutamol using solution nebulizers at ± 7 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

Table S 1. Yearly prescribing rates of inhaled salbutamol, categorized by dry powder inhaler, metered-dose inhaler, and solution nebuliser in the CPRD-GOLD, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

Data source	Cohort name	Prescriptions start date	Prescriptions end date	Number of prescriptions	prescription rates/100.000 PMs	95% CI lower	95% CI upper

NC=No Count; SIDIAP=The Information System for Research on Primary Care

Table S 9. Yearly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the CPRD-Gold, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

Table S 10. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. Short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. Short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. Combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. Formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. Salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in CPRD-Gold data source.

NC=No Count; DK-DHR=Danish Data Health Registries

Table S 12. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the IMASIS data source.

Table S 13. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the IPCI data source.

NC=No Count; IPCI=Integrated Primary Care Information

Table S 14. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the IQVIA DA data source.

NC= No Count; DA=Disease Analyzer

Table S 15. Monthly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the NAJS data source.

Table S 17. The distribution of predefined indications for use for each inhaled salbutamol prescription within the window -365 and -1 of the index date, stratified by device type and reported separately for each data source: UK CPRD-Gold, Danish DK-DHR, Spanish IMASIS, Dutch IPCI, IQVIA DA, Croatian NAJS, and Spanish SIDIAP.

Variable name	Variable level	Data Sources Name						
		CPRD-Gold N (%)	DK-DHR N (%)	IMASIS N (%)	IPCI N (%)	IQVIA DA N (%)	NAJS N (%)	SIDIAP N (%)

Figure S 1. Yearly prescribing rates of inhaled salbutamol by device type -including dry powder inhalers, metered dose inhalers, and solution nebulizers- in the CPRD-Gold, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

CPRD-GOLD= Clinical Practice Research Datalink (CPRD) GOLD; DK-DHR=Danish Data Health Registries; IMASIS=Institute Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA= Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care.

Figure S 2. Yearly prescribing rates for i. all forms inhaled salbutamol (using dry powder inhaler, metered-dose inhaler, and solution nebuliser), ii. short acting Beta-2 agonists other than salbutamol (terbutaline and fenoterol), iii. short acting anticholinergic drugs (ipratropium bromide and oxitropium bromide), iv. combination of beta-2 agonists and anticholinergics (fenoterol + ipratropium bromide and salbutamol + ipratropium bromide), v. formoterol, vi. formoterol + inhaled corticosteroids (formoterol + beclomethasone and formoterol + budesonide), vii. salbutamol + inhaled corticosteroids (salbutamol + beclomethasone and salbutamol + budesonide), viii. oral salbutamol in the CPRD-Gold, DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP data sources.

CPRD-GOLD= Clinical Practice Research Datalink (CPRD) GOLD; DK-DHR=Danish Data Health Registries; IMASIS=Institute Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA= Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care.

Figure S 3. The distribution of predefined indications for use of inhaled salbutamol using dry powder inhalers at -365 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IPCI, IQVIA DA, NAJS, and SIDIAP.

Note= No counts on dry powder inhaler usage were available in the IMASIS dataset, as it is based on hospital data, which does not capture this form of therapy.

CPRD=Clinical Practice Research Datalink; DK-DHR=Danish Data Health Registries; IMASIS=Institut Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA=Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care

Figure S 4. The distribution of predefined indications for use of inhaled salbutamol using dry powder inhalers at ± 7 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IPCI, IQVIA DA, NAJS, and SIDIAP.

Note= No counts on dry powder inhaler usage were available in the IMASIS dataset, as it is based on hospital data, which does not capture this form of therapy.

CPRD=Clinical Practice Research Datalink; DK-DHR=Danish Data Health Registries; IMASIS=Institut Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA=Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care

Figure S 5. The distribution of predefined indications for use of inhaled salbutamol using metered-dose inhalers at -365 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

CPRD=Clinical Practice Research Datalink; DK-DHR=Danish Data Health Registries; IMASIS=Institut Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA=Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care

Figure S 6. The distribution of predefined indications for use of inhaled salbutamol using metered-dose inhalers at ± 7 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

CPRD=Clinical Practice Research Datalink; DK-DHR=Danish Data Health Registries; IMASIS=Institut Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA=Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care

Figure S 7. The distribution of predefined indications for use of inhaled salbutamol using solution nebulizers at -365 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

CPRD=Clinical Practice Research Datalink; DK-DHR=Danish Data Health Registries; IMASIS=Institut Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA=Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care

Figure S 8. The distribution of predefined indications for use of inhaled salbutamol using solution nebulizers at ± 7 days of index date of each prescription, stratified by year, across the data sources DK-DHR, IMASIS, IPCI, IQVIA DA, NAJS, and SIDIAP.

CPRD=Clinical Practice Research Datalink; DK-DHR=Danish Data Health Registries; IMASIS=Institut Municipal Assistència Sanitària Information System; IPCI=Integrated Primary Care Information; DA=Disease Analyzer; NAJS=Croatian National Public Health Information System; SIDIAP=The Information System for Research on Primary Care
